

OILFIELD SPECIALTY

OUTLAW DETERGENT

OUTLAW DETERGENT

This heavy duty detergent is highly alkaline and a very aggressive detergent. Product can be mixed up to 3 drums per kit! Our best selling rig wash - this product speeds up cleaning time and saves on labor cost.

Kit makes up to 3- 55 gallon drum, depending on application.

Product Name	Part #	Color	pH
OUTLAW RIG WASH KIT	CWS OUT	Brown	14.00

Drum Mixture	pH	%Solids	Haz
1 - 55 Gallon Drum	14.0	52	yes
2 - 55 Gallon Drums	13.0	22	no
3 - 55 Gallon Drums	12.0	17	no

VENOM LINE FLUSH / DEGREASER

VENOM

This concentrated product makes an excellent and popular line flush. Product works fast and efficient. Turn your regular cleaning detergent into a degreaser.

Kit makes up to 2- 55 gallon drum, depending on application.

Product Name	Part #	Color	pH
VENOM LINE FLUSH	CWS VNM	Purple	13.00

Drum Mixture	pH	%Solids	Haz
1 - 55 Gallon Drum	14.0	48	yes
2 - 55 Gallon Drums	13.0	19	no

OILFIELD SPECIALTY

RECLAIM IT

RECLAIM IT Demulsifier
This concentrated detergent is designed as a pressure washer detergent for use in water - oil separation systems. Product will demulsify while cleaning, allowing for first stage of oil & water separation.

Kit makes 1- 55 gallon drum, depending on application.

Product Name	Part #	Color	pH
RECLAIM IT	CWS RCM	Clear	13.00

Drum Mixture	pH	%Solids	Haz
1 - 55 Gallon Drum	13.0	23	no

OILFIELD SPECIALTY

OIL GATOR

OIL GATOR Remediation Absorbent
Absorbs up to six times its weight in oil or oil based products. Oil Gator remedial absorbs and encapsulates hydrocarbons from the surface of land and water.

When applied correctly, it will completely absorb toxins preventing them from leaching into the soils or into underground aquifers.

Product Name	Part #	Color	pH
OIL GATOR Remediation Absorbent	CWS OLG	Powder	N/A

Bag Mixture	Weight	Haz
1 bag per cubic yard	30lbs	no

SILVER SEAL

SILVER SEAL
Acts as a dispersant for clay particles and as a water-wetting surfactant to chemically remove drilling mud and leave all downhole surfaces water-wet. These properties can help ensure compatibility with drilling fluids and cements. A single-component mud-filter-cake removal system prepared by adding it to water.

Product Name	Part #	Color	pH
SILVER SEAL	CWS OFS	Lt Blue	9.0

GOLD SEAL

GOLD SEAL
Designed to alleviate minor lost circulation during primary cementing and to be used in plug cementing operations to help prevent slurry from migrating downhole away from the plug location.

A reactive fluid flush used before primary cementing to help improve mud displacement and cement bonding. It also helps control downhole fluid loss.

Product Name	Part #	Color	pH
GOLD SEAL	CWS OFG	Gold	11.0

OUR REFRACTING DETERGENT KIT

What am I looking for?

Customer Confidence

Refracting a solid for a detergent is fast and easy to do. The information will show the customer exactly what they are buying.

No more having to call the supplier and send costly tests that take time to analyze. Testing in the field is a huge time saver.

You can determine the benefits of concentrated products according to the shipping cost to you and your customer.

Better Knowledge of Detergents

You'll be able to determine the real strength of a product and why certain concentrations are a necessity in the washing business.

Offering Consistency

Everyone would like to receive what they paid for. How do you determine the consistency of your detergents?

It's not just about the same color or smell anymore. Now you and your sales team can bring science to the equation.

With this program you will always be ahead of the game in determining the right detergents to sell. Not just detergent consistency, but also sales consistency.

Long term detergent sales starts with the product knowledge in the field. Lead your sales team to the right track for customers to get what they paid for. Many fleetwash and carwash companies should change their dilutions with almost every season. Winter has harsher road grime while summer has a baking heat. Spring and Fall are in between these two. No matter the season, a different dilution and sometimes a different soap are called for. You'll know the difference.

Added services can mean additional money to everyone. Better chemical sales knowledge means more chemical sales and more money.

CALL FOR PRICING & AVAILABILITY

Our Exclusive Refracting Detergent Kit. What is included in the kit?

Portable Refractometer with ATC

Brix Refractometer with Brix Scales, 0-10%, +/-0.1% Accuracy, 0.10% Resolutions. Handheld portable refractometer for Brix (0.0 to 10.0%) measurement of low-concentrations of industrial fluids.

- Automatic temperature compensation and calibrated with distilled water using a tool-free calibration ring.
- Ambient light illuminates the scale; no additional power source is required.
- Sturdy design, made of sturdy Aluminum and not "carbon" plastic.
- Optical glass prism mounted in all-metal housing for quick temperature equilibrium between sample and prism.

Choose a Product for Your Kit

We're offering three bold samples to be shipped with this kit. Although, other options may be available. Here are the three to start with.

Degreaser - Strong Alkaline Based. Shampoo - High Concentrated, Foam Built. MicroEmulsion - Drum /Tank Mix Kit.

- High Concentrate Degreaser - Alkaline Based- 15% Refractive Index
- High Concentrated Ultra Wash - 15% Refractive Index
- Micro Emulsion Detergent-Alkaline Based-55% Refractive Index

"No detergent is designed for all cleaning applications. Pick a detergent that has been formulated for the right wash application."
